

FALL ROOTING COOL SEASON

Foliar-Pak® Armament P 3-12-2 Phosphorus is essential for protein synthesis, cell division, and the development of new tissue. Armament P increases phosphorus availability by preventing common soil nutrient interactions that tie up phosphorus.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Armament K 0-0-24 Potassium controls the translocation of carbohydrates and plant osmotic relations and is integral to protein synthesis. Armament K is formulated with long chain carbon technology specifically designed to deliver potassium to plant roots.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Promote Concentrated sea plant extracts, humates, wetting agents, and key nutrients improve antioxidant activity important for recovery of leaf and root tissue, enhancing the plant's ability to fight stress and maintain proper metabolic functions.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Caliber In the soil, calcium buffers salts that may be present in the root rhizosphere and maintains proper base saturation levels. This ultra-small calcium carbonate particle is easily solubilized and ensures that the calcium is rapidly available for root uptake or absorption to soil cation exchange sites.

Rate:
10 lb
per Acre

Optional:

Holganix® PB1 2-0-0 + microorganisms and protected by Armament®

Rate:
3 oz
per 1000 sq ft
