

S-Sul[®]

Sprayable Ammonium Sulfate

For bigger, tougher and meaner weeds you need to add the power of ammonium ions to your fertilizer tank mix.

University researchers believe nitrogen fertilizer's ammonium content enhances the uptake of herbicide into plants for improved performance: an increase of up to 30% in weed control can be achieved!

S-Sul (sprayable ammonium sulfate) improves herbicide performance. This high quality, pure white crystal nitrogen source dissolves quickly in water. **S-Sul** contains 99.5% ammonium sulfate.

S-Sul is designed to...

- minimize agitation requirements.
- contain no impurities.
- have a low use rate.
- decrease herbicide degradation.
- to be safe, simple and effective.

DIRECTIONS FOR USE:

Only a small amount, 8 to 20 pounds per 100 gallons of water, is needed.

51 pound bag
