DIRECTIONS FOR USE

Apply only as directed during the growing season.

Use Contec DG Dispersing Granule Technology 0-0-25 for greens, tees and other fine turf areas where a potassium fertilization is desired or when manganese and magnesium are needed to help correct or prevent deficiencies during the growing season.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also greatly reduce ball, shoe and mower pickup - minimizing nutrient loss. Cold weather and/or cold water (lower than 45° F / 7° C) can result in slower particle dispersion.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appear-

ance. This can occur even if immediate irrigation or rainfall occurs. It is recommended that this product be applied to dry turf only.

Application Rates:

- LIGHT: 2.0 lbs/1,000 sq. ft.
- LOW: 3.0 lbs/1,000 sq. ft.
- MEDIUM: 4.0 lbs/1,000 sq. ft.
- HIGH: 5.0 lbs/1,000 sq. ft.

For all applications:

Immediately after application, for optimum results, apply a minimum of 0.1 to 0.2 inches of water to disperse the granules.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden and sweep any product that lands on the driveway or street, back onto your lawn/garden.

Storage and Use:

- Store in a clean, dry place.
- Reseal opened bag by folding top down and securing.
- Use only clean, dry spreaders.
- Do not leave unused product in spreaders.

IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once.
