## Oreon™ / Premion™ Fact Sheet

AMVAC Chemical Corporation launched a new water-based PCNB + tebuconazole fungicide in 2016 named Oreon™. In 2017, a reviewer at the USPTO (United States Patent and Trademark Office) rejected the trademark Oreon, stating that in their opinion the name was too close to Orion®, a Syngenta® trademark for a wheat herbicide. Syngenta did not challenge the Oreon trademark, the government reviewer did.

Being a good corporate citizen, AMVAC® voluntarily agreed to change the trademark and we renamed our PCNB + tebuconazole fungicide from Oreon to Premion™. Here is some additional information you should know about this product name change:

- There are no legal challenges or encumbrances on the Oreon trademark.
- Oreon and Premion are the same EPA number, 5481-585.
- Oreon and Premion contain 37.85% PCNB and 2.5% tebuconazole.
- Oreon and Premion labels are identical except for the product name.
- Oreon and Premion are registered in all the same states.
- Oreon and Premion will be in the trade channels this fall, until all Oreon inventory is sold.

We realize there has been some confusion in the marketplace with the name change from Oreon to Premion. Our hope is this information clears up any of that confusion as the transition from the Oreon name to the Premion name nears its completion. Rest assured that whether the name on the jug is Oreon or Premion, it is the same premium, water-based PCNB + tebuconazole fungicide product inside.
