

THE FOUNDATION OF EXCELLENCE
A research first approach of perfecting turfgrass performance.

Premium Fine Fescue Brand

PURELINKS™

From the research farms at Pure-Seed Testing **PURELINKS** offers all of the quality characteristics desirable for fine fescues. Whether it's chewings, creeper, hard, or sheeps **PURELINKS** can be completely customized to meet your needs.

TWCA® = DROUGHT TOLERANCE

PURELINKS has extensive recovery attributes from drought and significant water reducing capabilities. Qualified by the Turfgrass Water Conservation Alliance, the components of **PURELINKS** have gone through the most rigorous drought tolerant testing to ensure the highest standards for tolerance on the market.

A HEALTHIER TURFGRASS

From a low maintenance higher cut on a golf course rough, to a finely manicured look in a home lawn, **PURELINKS** will perform and offer the latest developments in disease, drought, and shade tolerance. **PURELINKS** displays a pleasing blue-green color combined with good turf density and fine texture.

GEOGRAPHICAL ADAPTATION

PURELINKS has a wide range of adaptability. From the transition zone to northern climates it will perform quite well. **PURELINKS** is an excellent choice for golf course roughs and steep slopes and often left un-mowed for an appealing, low maintenance, natural look.

PURELINKS will establish and perform well when seeded at 2-4 lbs./1,000 sq. ft (170 kg./ha) for new installations. Under normal conditions it should fully establish in 14-21 days. First mowing should occur at 2"-3" (5-7 cm.).

PRODUCT FEATURES

- Low Maintenance
- Fine Textured/Low Growth
- Shade & Salt Tolerance
- Drought Tolerance
- High Leaf Density
