- **Speeds Up Germination**
- **100% Biodegradable**
- **Safe For Pets And Children**

2.5 CUBIC FT. BALE
COVERS UP TO
500 SQ. FT.

DIRECTIONS

1. Prepare adequate seedbed that allows good seed-to-soil contact. Remove all weeds, twigs, and debris. Spread seed at suggested rate for the seed type and equipment used.
2. Cover area evenly with EZ-Straw to protect grass seed from birds, wind, and rain.
3. Fertilize with a granular starter fertilizer after EZ-Straw is applied.
4. Water after spreading to adhere the straw to the ground. Light watering daily will increase the success of grass germination and establishment.
5. Apply Foliar-Pak[®] liquid nutritional products to enhance establishment and get the best results.
