

# *iGO midi joins the iGO range of spray line markers*

Leading the industry with its awarding winning Impact paints, Linemark International is adding a new and innovative line marking machine to its highly successful iGO Mini, iGO Standard and iGO Deluxe range.

The iGO Midi features are innovative and highly functional:

- Innovative - twin probe, paint circulatory system of internal paint dispersion
- Compact – light, easily portable and highly maneuverable
- Powerful - five hours constant spraying from its 20 amp power unit
- Tough - robust high-gloss 'warm touch' powder coated framework

#### **Twin probe system**

Circulating system for internal paint dispersion.

#### **Heavy duty pump**

Easily accessible, pump provides consistent spray output.

#### **Spray Head**

The iGO Midi offers the possibility to place the spray head in front or to one of the two sides.

#### **Light weight**

Easy handling, carrying and storing.

# The Circulatory Paint System

## ***Continuously re-circulates paint for consistent spraying***

This innovative system continuously re-circulates paint during operation, improving flow to help sustain a consistent spray.

## ***Easier machine cleaning after use***

Immediately after marking, both probes are placed in clean water and the re-circulate function is activated for a few minutes to clean the internal system. An added advantage is a probe can then be used to wash down the machine externally.

## ***Impact Paints***

The award-winning Impact range of ready-to-use paints offers a choice of formulations for use on a wide range of surfaces: natural, hybrid and synthetic grass, and hard surfaces including asphalt and concrete.
