

DIVERSION

HydroPak® Diversion improves the infiltration of rainfall and irrigation through thatch, moving water, plant protectants and nutrients into the soil solution.

PRODUCT DESCRIPTION

HydroPak® Diversion is an injectable and sprayable penetrant that reduces the surface tension of irrigation water, improving its movement through repellent barriers and allowing dispersion throughout the root zone. Diversion may also be used to move soil-active fungicides, insecticides, herbicides and plant growth regulators into the soil. Improves water infiltration—efficient use of rainfall or irrigation

- Improves water infiltration for more efficient use of rainfall and irrigation
- Injection or spray application provides flexibility
- Neutralizes hard water ions to improve soil conditions

CONTAINS NON-PLANT FOOD INGREDIENT(S)

ACTIVE INGREDIENTS

Proprietary blend of alcohol ethoxylates, ethylenediaminetetraacetic acid and salts alkyl aryl sulfonate.....24.0%

Note: Read the information contained herein before buying or using this product. If the stated terms are not acceptable, return the product at once, unopened. It is critical that this product be used and mixed only as specified on this label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and/or handling. Precision Laboratories, LLC warrants that this material is reasonably fit for use as specified on this label. No agent or representative is authorized to make any other representations concerning this material. Unforeseen factors beyond Precision's control prevent elimination of risks in connection with the use of its chemicals. Such risks include, but are not limited to, damage to plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks may occur even though the product is reasonably fit for use as stated herein and even though label directions are followed. Follow directions carefully. Timing, mixture, method of application, weather and other conditions are influencing factors in the use of this product and are beyond the control of the seller. Except to the extent prohibited by applicable law, the exclusive remedy of the user or buyer and the limit of liability of the company or any other seller for any and all losses, personal injuries or damages resulting from the use of this product, shall be the purchase price paid by the user or buyer for the quantity of product involved.

DIRECTIONS FOR USE

Diversion is a multi-purpose surfactant, containing a water conditioner. Diversion significantly reduces the surface tension of water and improves the infiltration of rainfall and irrigation. Always mix and apply Diversion in accordance with label instructions.

Injection	Apply 20 to 40 fl oz (591 mL) of Diversion into water volume sufficient to treat one acre (.40 ha) of turfgrass.
Spray Application	Apply 20 to 40 fl oz (591 mL) of Diversion in a minimum of 60 gallons (227 L) of water to treat one acre (.40 ha) of turfgrass.
Application Interval	Use Diversion monthly throughout the growing season. The application interval may be adjusted as needed.
