COMMAND

ORGANIC ACID PENETRANT

Command is a multi-functional surfactant used to reduce surface tension and improve soil water plant relationships. Command is especially useful on areas where poor quality irrigation water is used.

GENERAL USE GUIDE

Golf course Turf Athletic fields Lawns	Apply 16 to 32 fl oz of Command™ per acre in 20 to 80 gallons of water. Rates may need to be adjusted up or down until desired performance is achieved. Irrigation soon after application may be advised to move product into the root zone.
Flushing of salts and bicarbonate formations	Apply 2.0 to 4.0 qt. of Command™ per acre in 20 to 80 gallons of water. Follow with heavy irrigation cycle to move water through the soil profile past root zone.
Injection Systems	Inject 20 ounces per acre in sufficient water to treat one acre of land. Reapplication may be needed every 3 to 5 weeks to achieve desired performance.
