

CSi™

12-0-0 + 25% Si

Foliar-Pak® CSi™ 12-0-0 + 25% Si offers bio-available plant derived silicon in opaline form delivered with plant derived carbon carrier.

PRODUCT DESCRIPTION/BENEFITS

- Foliar-Pak CSi 12-0-0 + 25% Si offers bio-available plant-derived silicon in opaline form delivered with plant derived carbon carrier.
- Foliar-Pak CSi strengthens turfgrass by providing the key nutrient silicon, delivered with a reliable carrier in a form that plants can immediately recognize and use.
- Silicon is one of the most important fortification nutrients for plants. Until now, it has been inefficient to try to deliver potassium silicate, slag or other forms of silicon. Foliar-Pak CSi contains 25% silicon in opaline form.
- Our plant derived nitrogen is immediately recognized by plants. Plants will respond to Foliar-Pak CSi and assimilate it with less energy expended and utilize it more efficiently.
- Foliar-Pak CSi provides true plant health response to biotic and abiotic stress by producing stronger cell walls, thicker leaf blades, more roots, and less trans-evaporation.
- The Silicon in CSi can increase plant turgidity, resulting in smoother surfaces, better green speed and increased wear tolerance.

GUARANTEED ANALYSIS

Total Nitrogen (N) 12.0%
 12.0% Water Soluble Nitrogen
 Derived from: soy protein hydrolysate

NON PLANT FOOD INGREDIENTS

Silicon (SiO₂) 25%
 Derived from: opaline silica as SiO₂

NET WEIGHT:

1 lb package
 Packaging Sizes: 6 x 1 lb case

GENERAL USE GUIDE

Low rates are weekly maintenance. High rates are corrective requirements. Adjust for biweekly applications.

Greens and Tees	Warm Season Turf: Apply 1.0 to 2.5 pounds per acre Cool Season Turf: Apply 0.5 to 1.5 pounds per acre
Fairways	Warm Season Turf: Apply 0.5 to 1.5 pounds per acre Cool Season Turf: Apply 0.5 to 1.5 pounds per acre
