

Foliar-Pak®

AERATION RECOVERY | WARM SEASON

Your golfers will thank you!

Treat your aerated turf with a complete foliar program, including natural plant extracts and active L-amino acids. Give your turf the necessary advantage for rapid recovery.

This warm season turf program results in more rapid closure of core cultivation holes, improved turf recovery and higher quality turf. With the use of this program, nitrogen applications for the purpose of aeration recovery can be considerably reduced or quite possibly eliminated.

Apply this program 3 days prior to aeration and again 7 days after aeration.

Foliar-Pak® 14-2-4 Balanced macro-nutrient fertilizer to supplement plant metabolic activity. Provides nutrients for consistent color and proper tissue development.

Rate:
3 to 6 oz
per 1000

Foliar-Pak® Promote Provides nutrients and plant extracts geared to improve antioxidant activity important for recovery of leaf and root tissue. Promote will help increase root growth after disruption from core cultivation.

Rate:
3 oz
per 1000

Foliar-Pak® Full Throttle Drives density and lateral growth. A bionutritional package specifically designed to strengthen turf, improve respiration, and allow for better regeneration of leaf stem and root biomass.

Rate:
2 to 3 oz
per 1000

Foliar-Pak® L-18 Activator™ Patented amino acid technology drives protein and enzyme production. This improves plant energy aspects for more rapid turf recovery.

Rate:
1.5 oz
per 1000

HOLGANIX® Golf Blend 66GC CT Organic, bionutritional product that promotes strong turf and plant health, naturally increasing resistance to disease and insect damage by promoting significant root and cell wall development.

Rate:
10 oz
per 1000
