NEW & IMPROVED!
Now with Molasses!

Foliar-Pak® AMPERAGE is a liquid blend of iron, manganese and zinc in an organic nitrogen matrix.

PRODUCT DESCRIPTION

- Foliar-Pak® AMPERAGE is formulated with a blend of gluconic sugars that hold the metallic ions in solution allowing the plant to assimilate the nutrients as they are required.
- Foliar-Pak® AMPERAGE is great for maintaining base levels of the primary minerals required for complete photosynthesis especially during periods of cool temperatures.
- Especially useful when plant metabolism declines due to low sunlight and sub-optimal temperatures.
- Energy will provide excellent plant color response due to superior uptake of micronutrients chelated with gluconates.
- Sugars from natural molasses energize plants and microbes with available carbon sources that stimulate biological activity.
- Greatly increases microbial activity and can aid in thatch reduction.

GENERAL USE GUIDE

This product can be mixed with most fertilizers and chemicals. A compatibility test should be performed prior to use. Shake product prior to use. Maintain agitation during mixing and application.

Golf Course Greens and Tees	Apply 3.0 to 6.0 fl oz per 1,000 sq ft in a minimum of 0.5 gal of spray solution per 1,000 sq ft. Repeat application every 7 to 14 days during periods of active turf growth or increased plant stress.
Golf Course Fairways	Apply 3.0 to 6.0 fl oz per 1,000 sq ft in a minimum of 0.5 gal of spray solution per 1,000 sq ft. Repeat application every 14 to 28 days during periods of active turf growth or increased plant stress.
Athletic Fields	Apply 3.0 to 6.0 fl oz per 1,000 sq ft in a minimum of 0.5 gal of spray solution per 1,000 sq ft. Repeat application every 14 to 28 days during periods of active turf growth or increased plant stress.

Foliar-Pak® AMPERAGE is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants
