

# Armament™ ZnB

A spray-on technology that improves granular fertilizer efficiency by complexing nutrients and protecting them from adverse interactions in the soil.

## BENEFITS

- Improves efficiencies and increases nutrient uptake, encouraging a quick and long lasting green up
- Non-staining, iron free formulation
- Unlocks the tied-up nutrients that already exist in the soil, turning them into plant usable nutrition
- Supplies stable, plant-available nutrients essential for root growth, cell wall development, and overall plant health

## HOW DOES IT WORK?

Foliar-Pak® Armament™ ZnB is designed to be sprayed onto a variety of granular formulations. Using spray-on technology, each fertilizer granule is completely coated with boron, zinc, and the Armament™ technology—creating an opportunity for better nutrient uptake in the turf through better rooting and increased nutrient availability.

## IMPORTANT NUTRIENT FUNCTIONS

### ARMAMENT™

Increases nutrient uptake by 20-30%

Complexes nutrients

Prevents nutrient-to-nutrient interactions and precipitations in the soil

### ZINC

Integral for tryptophan synthesis and auxin production—two elements that help initiate better rooting in turf

### BORON

Crucial for cell-wall development by providing structural linkages in cell walls

## GUARANTEED ANALYSIS

Boron (B) .....0.50%  
Zinc (Zn) .....4.0%

Derived from: sodium borate, EDTA zinc

## THE FOLLOWING ADVANCED TURF SOLUTIONS PROFESSIONAL TURF FERTILIZERS ARE PROTECTED BY ARMAMENT ZNB:

ANALYSIS	SLOW RELEASE	RATE LBS/1000	N/1000	RATE LBS/ACRE	N/ACRE
16-28-12	30% PCSCU	3.4	0.54	150	24
22-0-4	50% XCU	3.4	0.75	150	33
22-3-11	50% XCU	3.4	0.75	150	33
30-0-4	30% PCSCU	3.4	1.02	150	45
