

## ALYPSO™

## INFILTRATION SURFACTANT

Alypso is a unique, naturally-derived surfactant that speeds up the infiltration of irrigation through thatch and into hard-to-wet soils often encountered on golf courses and athletic fields. Using Alypso helps turfgrass managers produce superior playing surfaces by moving water into the root zone and improving the uptake of soluble nutrients.

**WHAT MAKES ALYPSO BETTER:**

- Faster water infiltration
- Uniform soil wetting
- Positive plant response
- Application flexibility
- Easy to use formulation
- Low use rates

Learn more at [www.precisionlab.com/Alypso](http://www.precisionlab.com/Alypso)

**FEATURES AND BENEFITS:**

- Faster water infiltration – decreased run-off or standing water and firmer playing surfaces
- Uniform soil wetting – maximum availability of nutrients and uniform placement of soil-active products
- Positive plant response – satisfied players
- Injected or sprayed – convenient to use
- Easy to use formulation – easy to pour, mix and store
- Low use rates – Less product to handle and store

**USE RATES**

- Injection – 1 pint per acre
- Spray – .36 to .5 ounces per 1,000 square feet

**PACKAGING**

- 2 x 2.5 gallons per case
- 20 gallon drum
