**12-0-0 + 25% Si**

**Foliar-Pak® CSi™ 12-0-0 + 25% Si offers bio-available plant derived silicon in opaline form delivered with plant derived carbon carrier.**

**PRODUCT DESCRIPTION**

- Foliar-Pak® CSi™ strengthens turfgrass by providing the key nutrient silicon, delivered with a reliable carrier in a form that plants can immediately recognize and use.
- Silicon is one of the most important fortification nutrients for plants. Until now, it has been inefficient to try to deliver potassium silicate, slag or other forms of silicon. Foliar-Pak® CSi™ contains 25% silicon in opaline form.
- Our plant derived nitrogen is immediately recognized by plants. Plants will respond to Foliar-Pak® CSi™ and assimilate it with less energy expended and utilize it more efficiently.
- Foliar-Pak® CSi™ provides true plant health response to biotic and abiotic stress by producing stronger cell walls, thicker leaf blades, more roots, and less trans-evaporation.
- Silicon moves to plant based needs quicker, stimulating plant growth where plants need fortification and providing a boost of energy and increased turgidity.
