

THE ULTIMATE ORNAMENTAL PACKAGE

Nutrient Program for Annuals, Perennials, Trees, and Shrubs

The Ultimate Ornamental Package is made of a synergistic blend of Foliar-Pak® products and next-generation Holganix® product:

Holganix PB1® A synergistic blend of Holganix-infused components, including a high concentration of 8 species of beneficial bacteria and mycorrhizae, enhanced with Armament technology to improve nutrient utilization.

Foliar-Pak® Bio 12-6-6 Plant benefits: bio-based nutrients improve nutrient uptake and improve the plant's ability to use those nutrients. Soil benefits: soil micro-organisms, provided by 12-6-6 Bio, provide better soil structure, nutrient holding capacity, and nutrient availability.

Foliar-Pak® Chloroburst Provides the iron and manganese necessary to build chlorophyll pigments in the leaves, allowing the plant to go through the process of photosynthesis and make energy for itself. It also provides the zinc necessary for the plant to go through RNA synthesis and auxin synthesis. The latter is crucial for growth at the apical meristems of plants. This allows for an increase in both shoot and root growth.

ANNUALS

- At planting, apply Healthy Grow 2-4-3 granular fertilizer infused with Holganix at rate of 8-10 lbs per 1000 sq ft in annual beds.
- Water twice a month with 1 gallon Holganix PB1, 1 gallon Foliar-Pak Bio 12-6-6, and 1 lb Foliar-Pak Chloroburst per 100 gallons of water.

TREES, SHRUBS, & PERENNIALS

- Mix 1 gallon Holganix PB1, 1 gallon Foliar-Pak Bio 12-6-6, and 1 lb Foliar-Pak Chloroburst in 100 gallons of water, and apply 1 gallon of mixture per DBH.
- Apply more Foliar-Pak Chloroburst in situations where the plant or tree is experiencing chronic iron or manganese deficiencies (3 oz per inch DBH, if applying to shrubs or perennials, use a sprench (spray/drench) application).
